

First Responder Hazardous Materials Awareness – 2 hrs.

This basic level course is designed to teach individuals how to safely and effectively manage a hazardous materials release until the arrival of additional specialized units. We go through how to properly utilize the information presented in the Emergency Response Guide to determine product specific information. We also discuss the State Regional Response Protocols.

This course is also available online at www.saferesponse.com

Host Responsibilities:

- ❖ Minimum 10 students.
- ❖ Projector, screen and laptop (please let NDFFA know if you don't have these items)
- ❖ Emergency Response Guidebook (please let NDFFA know if you don't have this book)
