

Responding to Flammable Gas Emergencies - 8 hrs.

The Responding to Flammable Gas Emergencies (FGE) course has been developed to meet current federal regulations. This two-part class consist of class-room and live-fire evolutions that will prepare students to function as a member of a fire control team during incidents involving flammable gas.

Part one consists of classroom presentations and tabletop demonstrations. It requires a minimum of 12 students and can be taught as a stand-alone, awareness level delivery or combined with live burn skills for operational level training. Part one can be conducted prior to scheduling live burn training but should be completed within 90 days prior to live burn training.

Part two of the course consists of live burn exercises. It is a four (4) hour, hands-on session. The session is designed for 24-36 qualified students to participate in live firefighting evolutions.

Host Responsibilities:

- Propane vendor to purchase 100-200 gallons of propane
- Engine with a minimum pumping capability of 750 gallons per minute
- Provide an operator for the engine
- Minimum space of 100' x 200' hard surface for props
- SCBA refill capability.
- Rehab (cases of water).
- Portable toilet or restroom.
- Minimum of 12 students, if not met, host organization(s) may be held responsible for the cost for the training including instructor fees, mileage, hotel, & incidentals.

Minimum Student Requirements

- Full PPE
- Working knowledge of Self Contained Breathing Apparatus (SCBA).
- Clean shaven. Clean shaven means no facial hair is present where the seal of the air mask comes into contact with your face. Live Fire Instructors have been instructed to not allow students to participate in live fire classes who do not meet this clean-shaven definition above.
- Students must 18 years or older
