b. **Termination for Lack of Funding or Authority.** The State may terminate this contract effective upon delivery of written notice to the contractor, or on any later date stated in the notice, under any of the following conditions:

i. If funding from federal, state, or other sources is not obtained and continued at levels sufficient to allow for purchase of the services or supplies in the indicated quantities or term. The contract may be modified by agreement of the parties in writing to accommodate a reduction in funds.

ii. If federal or state regulations or guidelines are modified, changed or interpreted in such a way that the services are no longer allowable or appropriate for purchase under this contract or are no longer eligible for the funding proposed for payments authorized by this contract.

iii. If any license or certificate required by law or regulation to be held by the contractor to provide the services required by the contract is for any reason denied, revoked or not renewed.

Any such termination of this contract under (i), (ii), or (iii), above, shall be without prejudice to any obligations or liabilities of either party already accrued prior to such termination.

c. **Termination for Cause.** The State by written notice to the contractor may terminate the whole or any part of this contract:

i. If the contractor fails to provide services required by this contract within the time specified herein or any extension thereof; or

GPS Tracker with Panic Button
Specification and Bid Response

The North Dakota Department of Transportation is seeking bids to secure a GPS tracking system with individual tracking units. **The units must each be outfitted with a panic button.** 40-50 NDDOT Drivers License Division employees will be utilizing the devices at eight locations statewide.

The NDDOT will need to be able to access an on-line software monitoring interface in order to locate all tracker-carrying employees via GPS, at all times.

The intention of the bid is to be able to locate an employee in an emergency situation or missing person scenario. That may be in a moving vehicle or in a stationary location. The system must accommodate this requirement. One position per five to ten minute interval should be sufficient.

We anticipate a simple tracking device, as the carrying employee does not need to have access to a map for location.

Since this will involve an on-line system, it should be serviced by the owner/provider as part of their normal operations. The system must be available and working properly 24/7 for emergency and non-emergency access.

2-3 users per location (up to 24 total users) will need access to the on-line software monitoring interface, which will be used to locate the employees in the field carrying the GPS devices.

The product **will not** be integrated with the State's IT system.

NDDOT shall bear sole responsibility for notifying police of an employee's status should an emergency situation arise.
