Re: NDDOT Bid no. 765-58-15-050, Snow Blower, 3 Pt, HD Front Mount

---

Bidders Instruction #11 of the solicitation established a deadline for receipt of questions. The responses to these questions are provided as addenda to the solicitation. The solicitation is amended to include any new information provided in this amendment.

Question 1) Please provide the tractor make and model that the referenced front mount snow blower will be mounted to.

Answer 1) NDDOT currently has two brands of tractors that have front 3pt and PTO.
-Challenger MT545B CVT
-Case IH Puma 145 CVT
Both of these tractor models are equipped with front PTO that turns the same as the rear PTO. So the snow blowers can be used on the front or rear of the tractor with no modifications to the snow blower

Question 2) Does the PTO need to rotate clockwise or counter clockwise when you are facing it?

Answer 2) The PTO rotation on the snow blower will be the standard rotation of a rear PTO tractor. NDDOT's front PTO tractors rotate the same as the rear PTO to enable us to use a snow blower on either the front or rear of the tractor, without modifications to the implement. Standard rotation is what NDDOT is requesting.

Re: BID NO. 765-58-15-050, SNOW BLOWER, HD FRONT MOUNT, 3PT

Bidders Instruction #11 of the solicitation established a deadline for receipt of questions. The responses to these questions are provided as addenda to the solicitation. The solicitation is amended to include any new information provided in this amendment.

Question 1) What direction does the PTO need to turn on the snow blower? The bid is asking for a snow blower to be mounted on the front 3pt of a 120 hp ag tractor, but front PTOs generally rotate in a different direction than rear PTOs. The bid also asks that the snow blower be capable of mounting and use on both the front and rear 3pt tractor mounts. Can you please clarify the desired PTO shaft rotation required for this 3 pt snow blower up for bid?

Answer 1) NDDOT has a fleet of CNH Puma 145 and Challenger MT545B Tractors that are equipped with both front 3pt hitch and 1,000 rpm PTO. Standard front PTO rotation is Counter-clockwise as looking at the front of the tractor or end of PTO shaft, and standard rear PTO rotation is Clockwise as looking at PTO shaft or sitting in the driver's seat.

However, NDDOT uses snow blowers and other implements on both the front and rear of these tractors, therefore, the front PTO needs to turn the same direction (as looking straight at the shaft), as the rear PTO – and this needs to be Clockwise rotation. NDDOT orders all new front PTO equipped tractors to come with Clockwise rotation, therefore, snow blowers can be attached at either the front of the tractor or rear with no modification to the snow blower or other implement. For these reasons we are asking for a standard 1,000 rpm snow blower as per spec, and declare that it is to be capable of mounting on front or rear of the tractor. This should require no PTO alterations to standard build rear 3pt snow blower.
