BID PRICE: The total bid price is to include all discounts and deductions, and is to be less federal and state taxes. Tax exemption certificates will be furnished upon request.

Unit prices are to be the price per TON for salt in bulk, delivered by truck, F.O.B. Destination, to the NDDOT delivery locations specified herein.

Delivery to locations not shown in the bid response will be at the unit price established for the closest bid point.

Payment for sodium chloride failing to meet product specifications may be reduced at a rate of up to twenty percent (20%) of the invoice price per ton. The State reserves the right to waive any or all price adjustments. For price adjustments due to liquidated damages, see the Performance Requirements section.

OFF SEASON DISCOUNT: A bidder who is concerned with meeting delivery deadlines in the late fall to fill orders, may want to plan for summer or off season deliveries. The summer or off season deliveries may also provide for better opportunity of back hauls which could reduce shipping costs. Bidders are invited to submit an 'off-season' delivery discount for orders placed **May 1 – August 31**. The discount will be a percentage off of the delivered price by district. Bidders are not required to include discounts in their bid offer. If offered, please indicate this discount in the Bid Response section of this bid document.

Discounts will be applied if offered. If a discount is submitted, then the discount shall be bid as a percentage that will be calculated and deducted from the material total for each district.

Discounts will not be used to determine low bid by district.

FUEL SURCHARGE ADJUSTMENT: The contract will apply a fuel cost adjustment to motor diesel fuel for increases/decreases in fuel costs during the contract period. The adjustment will be based on the average monthly fuel cost and any increase/decrease will be applied to the loads shipped for the next month.

The Procurement Officer will determine a monthly average price for motor diesel fuel for each calendar month by using the weekly prices posted in the "Weekly Retail On-Highway Diesel Prices – Midwest Region" maintained by the Energy Information Administration of the U.S. Department of Energy (USDOE) to determine the fuel cost adjustment factor which will be applied. <http://tonto.eia.doe.gov/oog/info/wohdp/diesel.asp>.

Contractors, districts and the Maintenance Division will be notified by the Procurement Officer when a fuel cost adjustment is to be made.

The price for diesel fuel in the Midwest on the **1ST Monday of July 2014** as determined from USDOE reporting will be the **base price** from which adjustments will be determined. The following table is an example of the table which will be used to determine the unit price adjustment factor: The adjustment factor will be applied to the Contract Unit Price by District for road maintenance salt as awarded.

\$3.750	\$3.849	5.20%
\$3.850	\$3.949	5.85%

The table will expand upward and/or downward as necessitated by fuel price fluctuation.

Example: USDOE reports are issued each Monday. If June has four weeks reporting. ((June 7 @ \$2.899 + June 14 @ \$2.874 + June 21 @ \$2.908 + June 28 @\$2.893) / 4 wks.) = \$2.894 (rounded to two decimal places). This represents a unit price adjustment of -0.65% using the table presented above if the base fuel price is \$2.950 - \$3.049. If the Contract Unit Price is \$36.00 per Ton, then \$36.00 Ton x -0.65% = \$35.77 for the month of July shipments. The increased or decreased fuel cost adjustment for all loads shipped in July would be based on June's fuel cost adjustment factor and so on throughout the contract period.

The fuel cost adjustment method will not change throughout the term of the contract. An average for the last month of the contract annually will not be performed since at that time the contract will either be under review for extension or will be in the solicitation process. If the contract is extended, the new base price for diesel fuel will be the cost per gallon as determined by USDOE on the 1st Monday of July of each consecutive year.

CONTRACT VOLUME: The quantities to be purchased will depend on requirements as determined by climatic conditions. An estimation based on previous purchase requirements is listed in the schedule of contemplated purchases. It is possible that no purchases may be required for some of the shipping points listed. NDDOT reserves the right to vary purchase quantities from those indicated, based on actual need. Quantities are based on best information available at this time.

NDDOT, in consideration for the unit price obtained from the supplier, agrees to purchase under each contract a minimum of 70% of the estimated quantities. We reserve the right to purchase up to 130% of the estimated quantities, if inclement weather necessitates additional salt purchases.

PNEUMATIC DELIVERY: Some districts prefer pneumatic deliveries. Where indicated bidders shall provide a fee per ton which will be added to invoices for loads shipped with pneumatic equipment.

PERFORMANCE REQUIREMENTS

ORDERING AND DELIVERY REQUIREMENTS: Orders will be placed beginning **September 1, 2014.**

The North Dakota Department of Transportation is divided into eight district locations. The district offices order salt for their sections. A listing of NDDOT contact people at each location will be provided to the successful bidder(s). The salt storage in the section locations is limited by the salt storage capacity; therefore, salt orders will be placed as needed throughout the winter. Severe weather may cause the rapid depletion of salt inventories, and require the district to place orders under emergency conditions. The district will notify the vendor that emergency conditions exist at the time the order is placed.

Orders will be placed by the districts for sodium chloride for shipment by truck, 27 ton / 25 metric ton lots, and in bulk form. Orders may be placed by telephone, facsimile, or email. The bidder shall deliver the order and bill the district. The NDDOT will then process payment through voucher with reference to contract number.

Routine deliveries must begin within 7 days and be completed within 12 calendar days after receipt of the order. For orders larger than 200 tons, an additional day shall be allowed for each 50 tons ordered over 200 tons. Emergency orders require delivery of a minimum of 100 ton / 91 metric ton (per district) within 96 hours of the order.

Occasionally, a district may order large quantities for salt/sand mixing. A district may be mixing at two locations, at the same time, in late September-early October. The district must give the vendor one week notice prior to the commencement of delivery. Orders for mixing may be as large as 700 tons and must be delivered within a two week period. The additional day for orders larger than 200 tons will not apply in this instance.

Vendors must notify the districts if they are unable to meet required delivery schedules. Consideration will be given for delays due to road closures. If deliveries cannot be made due to severe weather, the vendor must contact the ordering district so that NDDOT can prioritize deliveries. When situations warrant, the contractor may request and NDDOT may authorize delivery at times and by means not normally allowed under the terms of this contract.

LIQUIDATED DAMAGES: Liquidated damages will be assessed by NDDOT Maintenance Division at a rate of \$0.30/ton per day after 12 calendar days for routine orders, after the fourth calendar day for emergency orders, and after the adjusted required delivery period for orders larger than 200 tons. NDDOT districts should notify the Maintenance Division regarding orders eligible for the application of liquidated damages. The State reserves the right to waive any or all parts of these liquidated damages.

Risk Management Appendix

Service Contracts with Private Individuals, Companies, Corporations, Etc.:

Contractor agrees to defend, indemnify, and hold harmless the state of North Dakota, its agencies, officers and employees (State), from and against claims based on the vicarious liability of the State or its agents, but not against claims based on the State's contributory negligence, comparative and/or contributory negligence or fault, sole negligence, or intentional misconduct. The legal defense provided by Contractor to the State under this provision must be free of any conflicts of interest, even if retention of separate legal counsel for the State is necessary. Contractor also agrees to defend, indemnify, and hold the State harmless for all costs, expenses and attorneys' fees incurred if the State prevails in an action against Contractor in establishing and litigating the indemnification coverage provided herein. This obligation shall continue after the termination of this agreement.

Contractor shall secure and keep in force during the term of this agreement, from insurance companies, government self-insurance pools or government self-retention funds authorized to do business in North Dakota, the following insurance coverages:

The Contractor shall be held responsible for ensuring compliance with those requirements by all Subcontractors.

Contractor's insurance coverage shall be primary (i.e., pay first) as respects any insurance, self-insurance or self-retention maintained by the State. Any insurance, self-insurance or self-retention maintained by the State shall be excess of the Contractor's insurance and shall not contribute with it.
