The bid is amended to include the following information.

Bidders delete Page 7 of 8 from the bid document and add the attached amended Page 7 of 8.

Q1) Page 7 of 8. For the requirement regarding the GPS device being small enough to fit in a user's pocket or clipped to a belt, does NDDOT anticipate a simple tracking device or a cell phone and/or smart phone-like device where they can also access a map showing their location?

A2) Reference Bid Response, Page 7 of 8. The bid response Item numbers have been corrected. The NDDOT will be awarding on Item 1 and Item 4 combined total.

Q3) What frequency or latency is required for position reporting from the device? Example: The device shall report x number of positions per second/minute.

A3) The intention of the bid is to be able to locate the employee in an emergency missing person scenario. That may be in a moving vehicle or in a stationary location. The system must accommodate this requirement. One position per five to ten minute intervals should be sufficient.

Q4) Is there a specific service level agreement or standard for system availability or up-time that the state requires for this capability?

A4) Since this will be an on-line system, it should be serviced by the owner/provider as part of their normal operation. The system must be available and working properly 24/7 for emergency or non-emergency access.

Q5) How many users does the state anticipate having access to the on-line software monitoring interface that employees will use to locate the employees in the field with the GPS device?

A5) One administrator with a backup should be sufficient, so two.

Q6) Is there a liability on the vendor and associated service if there is an incident or other issue while using this device and service?

A6) Reference Paragraph 3, Page 7 of 8. No. The DOT will contact authorities as necessary. However, a contractor whose product did not perform successfully would be in jeopardy of losing the contract for non-performance.

Q7) Does the state require that the proposed solution and service be delivered and fully functional "out-of-the-box" on November 1, 2012?

A7) Reference Page 7 of 8. No. Since this will be an "off-the-shelf" internet based product, it is anticipated that upon award the start up will be fairly quick and uncomplicated.

Q8) Does the State anticipate some time required to configure or integrate the proposed solution with other reporting systems or IT solutions in use by NDDOT?

A8) The awarded contractor will provide an internet based product that is not integrated with the State's IT system.
