COMMERCIAL CLASS PAVER

CP100 II

Engine	100hp (74kW) Cummins Tier IVf
Std. Width	8'-15' (2.43-4.59m)
Max Width	17' (5.18m)
Weight	22,000 lbs (9979kg)

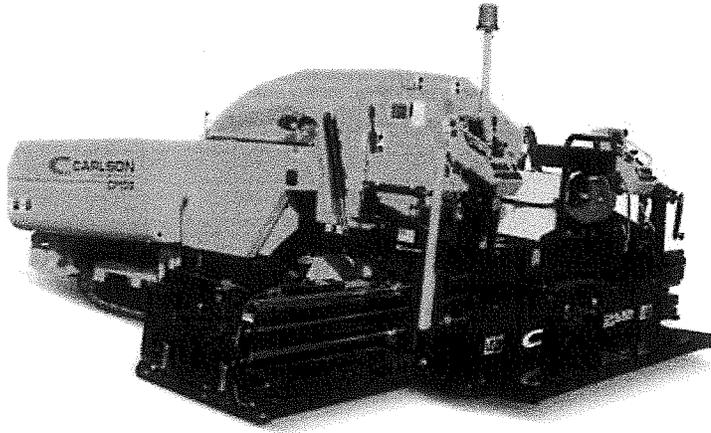

OVERVIEW

Meet the new standard in commercial paver platforms. The all new CP100 II, the next generation of the commercial-class' leading heavy-duty platform, has arrived. Featuring a powerful and reliable Cummins Tier IV Final engine, highway-class wear components and its class-leading screed platform in the EZCSS, the CP100 II delivers a new level of performance and mat quality to contractors.

From small to large-scale commercial paving projects, the CP100 II meets and exceeds the demands of contractors. The platform's versatility and dimensions enable the paver to be utilized in size restrictive areas, such as parking garages, while having the performance and contractor-focus for large-scale parking lot or municipal road applications. The CP100 II is able to do so with its all-new EZCSS 8'-15' screed, the heaviest-duty material distribution system in the commercial class, and a fully rebuildable platform with replaceable auger flights, bolt-on replaceable floor plates and one piece steel frame for longer machine lifecycle. Along with its intuitive controls and availability in 2-man and 3-man configurations, the CP100 II provides contractors a commercial platform unmatched in quality, performance and longevity.

2-Man Option Shown

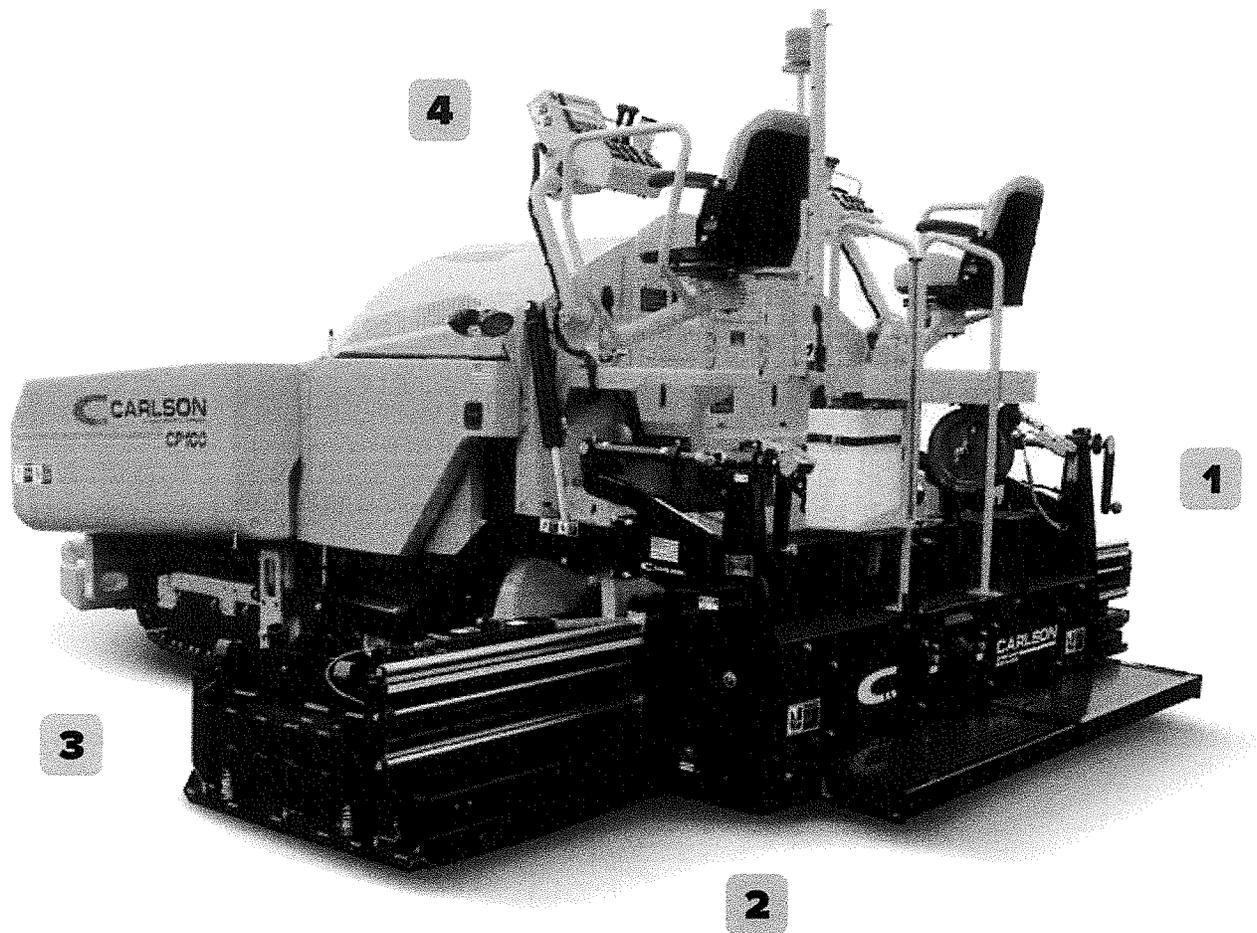

Unmatched Performance with its powerful, high torque Cummins® QSF3.8 Tier IV Final engine, one piece heavy-duty frame, highway-class wear components and a fully rebuildable, long lasting platform.

Unequaled Contractor Focus with its dual control stations with intuitive switch placement, multiple platform configurations and the most standard crew comfort features in its class.

Unparalleled Mat Quality with the class-leading EZCSS electrically heated screed, featuring over 30 years of award winning mat quality and performance of Carlson's highway-class front-mount platforms in a commercial class package.

FEATURES & BENEFITS

Manufactured to outlast and outperform, the CP100 II is built from the ground up to meet the demands of the contractor. Combining the heaviest duty components with leading performance, it is no wonder why the CP100 name has become synonymous with reliability, quality and ease of maintenance.

3-Man Option Shown

1 Heavy-Duty Steel Frame

For the CP100 II, it all starts with the frame. Constructed of cold-rolled steel, the CP100 II's single piece frame provides contractors with a longer lasting, higher quality chassis, making it the most robust platform in its class. And since all the pavers wear components and add-ons are bolted to the frame, the CP100 II is able to be fully rebuilt around the heavy-duty frame for even longer service life.

2 Power And Performance

Proven reliability, high torque and impressive power are delivered from the 100 horsepower (74kW) Cummins® QSF3.8 Tier IV Final turbocharged engine, coupled with closed loop hydraulics. Producing increased torque figures compared to its predecessor, the CP100 II is able to effortlessly push highway-class asphalt trailers and conquer any day's job.

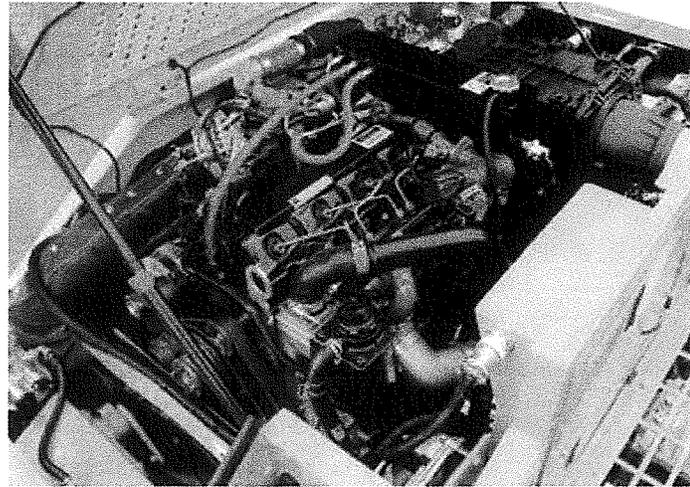

Maintenance on and around the engine is made accessible with Carlson's leading engine compartment layout. With a one piece, forward tilting hood, largest side doors in its class, and front access panel in the hopper, service to the CP100 II's engine, hydraulics and electrical can be done quickly and comfortably for greater productivity and less machine downtime.

3 Track System

Comprising of 7 bogeys, return idler, the largest planetary drives in its class and 14" (356mm) wide poly-pad tracks that provide exceptional lifecycle and performance, the CP100 II's track system gives contractors a robust, heavy-duty system that excels across a wide variety of bases and materials. Hydraulically self-tensioning, the paver's track system also comes standard with rock guards, giving the already robust platform added protection.

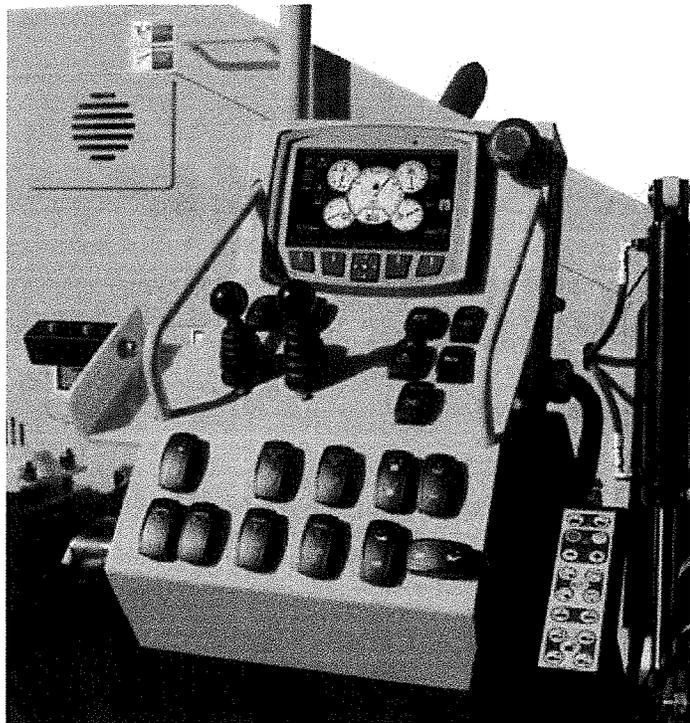

4 Dual Control Stations

The CP100 II comes standard with dual control stations enabling full control of paver and screed functions from either side. Each console features intuitively organized switch functions, electric over hydraulic steering levers, 7" touch screen display and wired remotes. The 2-man configuration features screed mounted controls that keep them relative to the operator at all times. In the 3-man configurations, the CP100 II's control consoles are able to pivot outwards 45° for enhanced visibility and are able to lower for operation in height restrictive areas.

The layout of the engine, hydraulics and electrical, along with its forward-tilting hood and large side doors, make service and maintenance easy and accessible.

The intuitively organized controls provides simple operation of the platform from both sides, while leading visibility to the augers and screed allow for close monitoring of material flow and head of material.

MATERIAL DISTRIBUTION

Among commercial-class paver platforms, there is no rival to the CP100 II's heavy-duty, highway-class material distribution system. Combining robust reliability with industry leading features, the CP100 II's material distribution system elevates paving performance, reduces replacement costs and simplifies end of day clean-up times.

**Highway-Class Components
For Leading Performance**

Hopper And Conveyors

To Carlson, heavy-duty isn't just a buzzword. We mean it. Featuring chains and slats 25% stronger than competitive pavers, the largest conveyor sprockets in their class, and easily accessible conveyor tension adjustment points, the CP100 II's 9.5 ton hopper efficiently moves material while giving operators longer wear component lifecycle. Even the CP100 II's hopper wings are the most robust in their class, constructed of ½" steel and requiring no external support like competitive machines, while the heavy-duty lift cylinders provide superior lift angles for even greater material flow.

Clean up of the hopper and conveyors is drastically reduced by the system's design and accessibility. From the between the tracks conveyor design that eliminates the need for daily under hopper cleanout or a hydraulically lifting floor, to the flip up front apron for washdown of the conveyor chains and sprockets, the CP100 II gives contractors a longer lasting platform combined with unrivaled ease of clean up.

Heavy-Duty Floor Plates

Like all Carlson commercial-class pavers, the CP100 II utilizes 3/8" (9.5mm) heavy-duty, 450 Brinell-rated hardened steel floor plates for longer lifecycle and better performance. These class-leading floor plates are also fully replaceable, enabling contractors to rebuild their machine for even longer machine lifecycle and greater return on investment.

Auger Flights And Bearings

The CP100 II's fully replaceable 13" (330mm) 500 Brinell-rated steel auger flights provide best-in-class material flow towards the endgates while also ensuring leading component lifecycle. Held in place by the heaviest duty, fully sealed bearing in its class, the CP100 II's augers are truly highway-class for higher production and lower maintenance costs.

Horizontal Sliding Damper Doors

A Carlson exclusive feature, the horizontal sliding damper doors on the CP100 II keep obstructions, such as utility boxes, from damaging them while open. Able to be infinitely adjusted from fully open to closed, contractors are able to utilize the doors' tunnel effect for wider width paving or for narrow width applications, such as utility cuts. The horizontally sliding doors also prevent material from falling when traveling across the jobsite to the next pull.

Automation And Sonics

For more even head of material at any width, the CP100 II is available with sonic augers and hydraulic tow points. The CP100 II is also prewired as standard to accept grade and slope automation systems, including those sold by MOBA®, Topcon® and TF Technologies®.

SCREED

Only one commercial paver line carries the industry's leading screed platforms: Carlson's CP series of pavers. And with the all-new EZCSS single slide screed, commercial contractors have a true Carlson highway-class platform in a commercial-class package for unmatched mat quality and unparalleled paving performance.

**Award Winning Highway-Class Mat Quality
In A Commercial-Class Screed**

Highway-Class Features

Just like its highway-class screeds, renowned for their award-winning mat quality, the EZCSS shares many similarities to Carlson's larger platforms. Standard with state-of-the-art electric heating elements for clean, even heat across the main and extension plates, the EZCSS also incorporates with each element a full length hold down for better heat transfer to the plate. Add in the spring loaded endgates, innovative screed deck cone system for easy leveling, standard manual extension heat, slope and crown adjustments, and the EZCSS has the most standard screed features in its class for superior ride uniformity and mat quality.

Screed Plates

Built with the Carlson class exclusive 2% taper, a feature that improves outboard flow of material regardless if the augers are on, the EZCSS screed utilizes a 16" (406mm) deep main screed plate and 8" (203mm) deep extension plates. Each plate is made of 3/8" (9.5mm) 450 Brinell-rated hardened steel, giving contractors leading plate lifecycle and unparalleled mat quality. The EZCSS also has class leading adjustable pre-strike offs tightly fitted to the main, a feature that allows little to no damage to occur when obstructions are bumped or hit due to poor elevation.

Options For Customization

Contractors are able to add enhanced versatility and customizability to their EZCSS screed through an array of class-leading attachments and functions. Able to be added anytime, contractors can tailor their screed to the demands and requirements of any job including:

- The Carlson Safety Edge endgate produces seamless, extruded 30° mat edges for safer roadway re-entry and eliminates the need for hand tamping. Standard with heat, the Carlson Safety Edge is able to be adjusted from 30° to joint matching with its integrated, externally mounted jack.
- The 12" and 18" Integral Berm option enables contractors to construct a seamless 4" outside edge rise berm curb through quick manual adjustments.
- Power functions can be easily added to the EZCSS to provide greater versatility and enhanced paving performance. These functions include Power Crown for 3" (76mm) crown to 1" (25mm) invert, Power Slope for up to 9% extension slope capability, Power Extension Height for quick adjustment on the fly, and Extension Vibration.

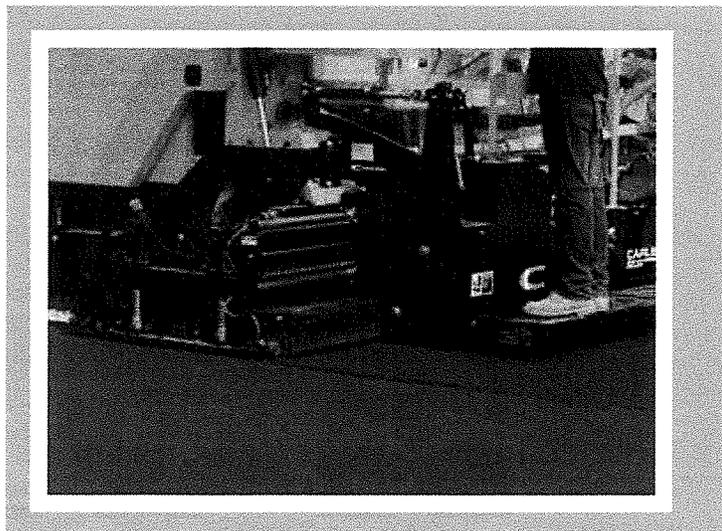

EZCSS

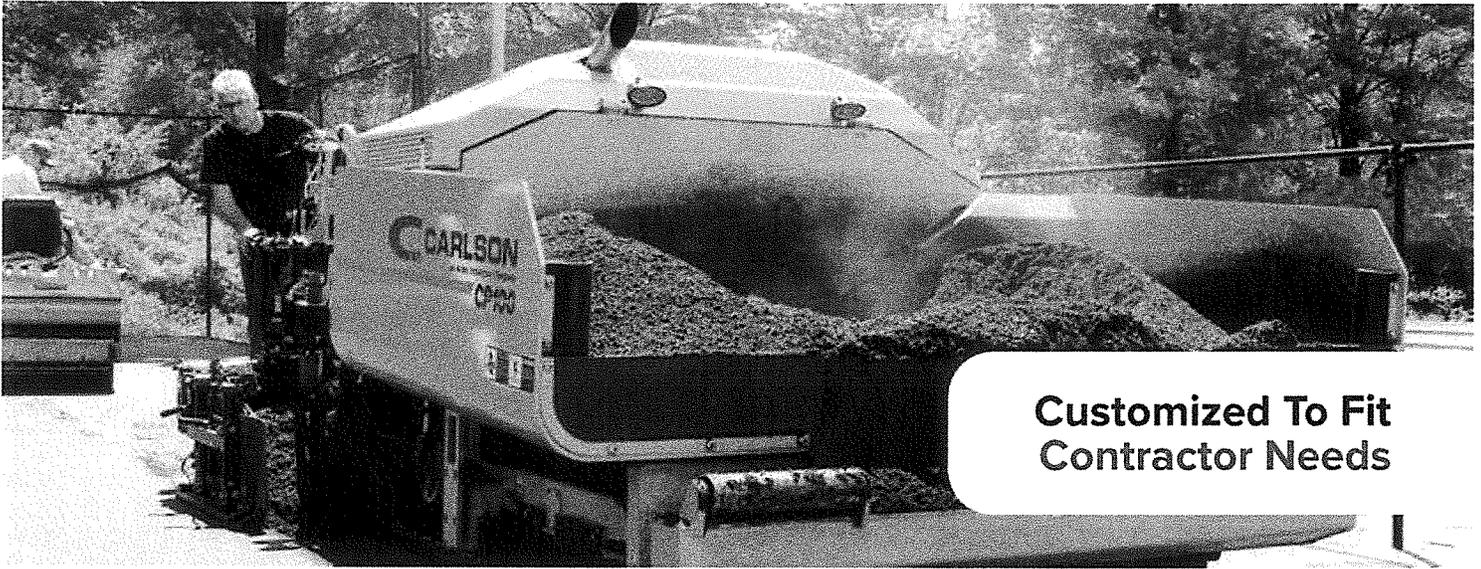

Extensions

Like its industry-leading highway-class screeds, the EZCSS commercial screed features Carlson's exclusive single slide extension support system that drastically reduces component replacement costs and achieves exceptional extension rigidity. The 1.5" diameter chrome rods provide fluid inboard and outboard motion while the heavy duty tubular frame the rods are fixed to bears the weight and forces on the extensions.

Along with the only adjustable slide block bushings in its class, on-the-fly angle of attack adjustment, and half the wear components of competitive platforms, the EZCSS's extension support system represents a watershed moment for commercial class mat quality and reliability.

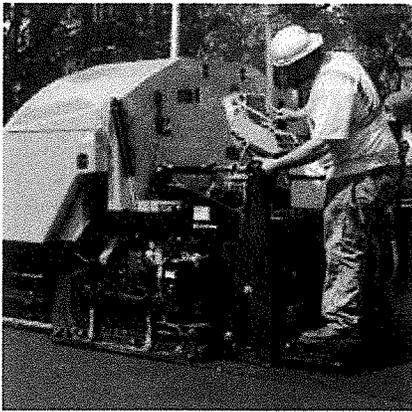

OPTIONS & SPECS

**Customized To Fit
Contractor Needs**

With its ability to be customized to the needs of the contractor, the CP100 II is available with a wide array of options and attachments. Ranging from paving performance to operator comfort, all of the CP100 II's options are able to be easily bolted on allowing contractors to add versatility and ability when needed. Simply put, no other paver in its class can match the customizability of the CP100 II.

NDDOT

April 14, 2020

Swanston Equipment is a full servicing dealer for Carlson Pavers with trained technicians. If a breakdown should occur, we have the ability to do the repairs in our facility or schedule an onsite visit. Our parts department carries maintenance items on hand and if required, parts can be sent overnight. We generally stock multiple pavers and we should be able to supply a back up paver if the need should arise. The NDDOT has had success with our paver in the past and the crews seem very comfortable running the Carlson paver. Please let me know if you have any questions.

Thank you for the opportunity,

TERMS AND CONDITIONS

AGREEMENT:

Lessor, in consideration of the covenants, promises, and agreements on the part of the Lessee, hereinafter contained, hereby leases the equipment to Lessee in accordance with the terms of this agreement.

AMENDMENTS:

The terms of this agreement shall not be waived, altered, modified, supplemented, or amended, in any manner whatsoever, except by written instrument signed by the parties.

TRANSPORTATION CHARGES:

Lessee shall pay to the Lessor transportation charges incurred by Lessor in delivering the equipment to Lessee, and shall pay all such charges to return the equipment to Lessor upon termination of the lease. If applicable, transportation charges may be included in the rental rate.

OPERATION OF EQUIPMENT:

Lessee agrees that the equipment will be operated only by competent employees and will not be operated beyond the manufacturer's rated capacity nor improperly cared for or abused. The Lessee will pay for all costs of operation including regular maintenance and all repairs necessary due to improper use. Lessor shall supply all information necessary for Lessee to properly prepare operators and maintenance for their responsibilities. The equipment shall be returned to Lessor in as good condition as received, less reasonable wear and tear.

REPAIRS:

The expense of all major repairs made during the rental period, which shall be made by the Lessor's maintenance personnel, including labor, parts, mileage and other items will be paid by the Lessor unless required repairs are due to abuse or misuse of the equipment. The Lessee agrees to pay for repair of damaged tires or excessive wear. Cuts resulting in permanent damage to a tire will be subject to repair or replacement by Lessee if due to improper use or abuse. If the machine is down for more than 24 hours due to repairs, Lessor will issue credit of the prorated rental rate, or replace with a like or similar machine, if mutually agreed upon, or the agreement may be terminated and credited accordingly.

WARRANTY:

Lessor assigns to Lessee, for and during the term of this agreement, so long as Lessee shall not be in default, all manufacturer's warranties and guarantees, express or implied, issued on or applicable to the equipment.

ALTERATIONS AND MODIFICATIONS OF EQUIPMENT:

Lessee shall not make any additions, attachments, alterations or improvements to the equipment without the prior written consent of Lessor. Any addition, attachment, alteration or improvement of equipment shall belong to and become the property of Lessor unless, at the request of the Lessor, it is removed prior to the return of such item of equipment by Lessee. Lessee shall be responsible for all costs relating to such removal and shall restore such item of equipment to its operating condition that existed at the time it became subject to the applicable lease.

LIABILITY:

Lessee and Lessor each agrees to assume its own liability for any and all claims of any nature including all costs, expenses and attorneys' fees which may in any manner result from or arise out of this agreement.

INSURANCE:

Insurance shall be secured and kept in force during the term of this agreement, from insurance companies or a government self-insurance pool authorized to do business in the state of North Dakota, to include the following coverage:

- 1) Lessee and Lessor shall provide commercial general liability with minimum liability limits of \$250,000 per person and \$1,000,000 per occurrence.
- 2) Lessee shall provide property insurance insuring the full and true value of the equipment. Insurance policy shall name Lessee as insured and Lessor as an additional insured and loss payee thereof as Lessor's interest may appear. An Evidence of Property Insurance shall be provided to the Lessor by the Lessee.

The insurance coverage listed above shall meet the following additional requirements:

- 1) Any deductible or self insured retention amount or other similar obligation shall be the sole responsibility of the party purchasing the coverage.
- 2) This insurance may be in policy or policies of insurance, primary and excess, including the so-called umbrella or catastrophe form and must be placed with insurers rated "A" or better by A. M. Best Company Inc., provided any excess policy follows form for coverage. "Follows form" means the excess policy must be written with the same terms and conditions as the policy to which is in excess.
- 3) Either party may request a certificate of insurance evidencing the required coverage that is in effect and providing that the coverage may not be canceled or modified without thirty (30) days prior written notice to the other party.
- 4) Failure to provide insurance as required in this agreement is a material breach of contract.

TAXES:

The State does not pay sales tax or most federal taxes. The State's sales tax exemption number is E-2001. The federal tax free transaction number is 45-70-0010K. the federal employer identification number is 45-0309764.

INSPECTION:

Lessee agrees to permit Lessor or its representatives to inspect equipment leased hereunder at all reasonable times upon request of Lessor.

TERMINATION:

- a. This agreement may be terminated by mutual consent of both parties, or by either party upon 30 day's notice, in writing or delivered by certified mail or in person.
- b. In addition, Lessee may terminate this agreement effective upon delivery of written notice to the Lessor, or at such later date as may be established by Lessee, under any of the following conditions:
 - 1) If Lessee funding from federal, state, or other sources is not obtained and continued at levels sufficient to allow for purchase of the indicated quantity of services. The agreement may be modified unilaterally to accommodate a reduction in funds.
 - 2) If federal or state regulations or guidelines are modified, changed, or interpreted in such a way that the services are no longer allowable or appropriate for purchase under this agreement or are no longer eligible for the funding proposed for payments authorized by this agreement.
 - 3) If any license or certificate required by law or regulation to be held by the Lessor to provide the services required by the agreement is for any reason denied or revoked.

Any such termination of this agreement under (1), (2), or(3), above, shall be without prejudice to any obligations of either party already accrued prior to such termination.

- c. Either party, by written notice, may terminate the whole or any part of this agreement:
 - 1) If either party fails to provide services called for by this agreement within the time specified herein or any extension thereof; or
 - 2) If either party fails to perform any other provisions of this agreement, or so fails to pursue the work as to endanger performance of this agreement in accordance with its terms, and after receipt of written notice from either party, fails to correct such failures within ten days or such longer period as either party may authorize.

LESSEE AGREES TO:

- 1 Notify Lessor of any change in agreed location.
- 2 Not sublease, rent or loan above equipment.
- 3 Not hold Lessor responsible for weather conditions, such as rain, snow, etc. No credit is expected because of these conditions.
- 4 Notify Lessor immediately of any mechanical failure, at which time a decision will be made who is responsible for repairs.
- 5 Pay a clean up charge for excessively dirty equipment.

PURCHASE ORDER:

A Purchase Order will not be issued as a result of this agreement. The executed agreement will bind the contractual obligation of the Lessee. Purchase Orders or Claim for Payments will be executed for payment of monthly invoices.

RENTAL PAYMENTS:

Lessee shall pay Lessor, upon invoice, rental payments. Payment for itemized additional charges is upon invoice. All rent and other amounts payable by Lessee to Lessor hereunder shall be paid to Lessor at the address specified above or at such other place as Lessor may designate in writing to Lessee.

LATE PAYMENTS:

Customary late charges on accounts not paid within thirty (30) days of invoice are allowable, not to exceed the maximum rate of interest permitted by law.

EXTENDED RENTAL PERIOD:

Lessee shall notify Lessor of extended rental needs. Lessee reserves the right to negotiate seasonal rates with the Lessor and may opt to extend the agreement upon mutual consent.

REQUEST FOR BID:

If a written request for bid for the equipment rental was solicited, any accompanying specific terms, conditions and specifications therein will become part of this agreement.

GOVERNING LAW AND VENUE:

Notwithstanding any rules regarding the choice of law or venue, it is agreed by the parties that this agreement shall be governed by and construed in accordance with applicable Federal Law and the laws of the state of North Dakota, at the time the agreement was executed.
