Hydraulic Snowblower

A quality built blower that really works! Throw snow up to 40' while clearing paths down to the ground. Features a no-freeze-up chute design! Two important factors must be considered when purchasing a snowblower for your skid steer loader – gallons per minute and hydraulic pressure (p.s.i.) are very important to the ultimate performance and your satisfaction. Discuss these factors with your product specialist when purchasing. We custom engineer every snowblower to provide maximum performance for your make and model.

Hydraulic chute rotation and deflection is standard equipment. Our design eliminates metal-to-metal contact between the blower and the rotating chute base, preventing freeze-up under any conditions.

Throw snow up to 40'

FEATURES

- Direct drive hydraulic auger
- Replaceable bolt-on high carbon steel cutting edge
- Hydraulic relief – no shear pins
- Hydraulic control valve with electric solenoid controls all chute functions
- Easily adjustable depth skid shoes (optional)

Better by Design

- The durable new 5/8" x 6" cutting edge design provides significantly more surface area, allowing it to act as a skid shoe and extending the life of the cutting edge. You can now achieve the desired cutting effect simply by controlling the angle of the snowblower.
- Shortened end plates allow the auger to lead. In hard packed snow, the auger makes contact first and starts chewing it up for maximum effectiveness and reduced resistance.
- The cut back top design provides better visibility and allows snow to fall into the auger to be blown rather than slide off the back of the snowblower.
- The new cutting edge extends beyond the end plates, adding wear bar protection.
