Bert's Truck Equipment  
3804 US-75 North  
Moorhead MN. 56560

Dear Jim McLaughlin,

Please accept this letter as an explanation of price increase – for Pre-Wet System Components used with the Bonnell Commander Body and Equipment.

Reference: Bonnell Industries Inc. have provided Bert's Truck Equipment proposal #0145709 for the purpose of contract equipment between Bert's Truck Equipment and the North Dakota DOT. The understanding is – this contract will be honored for a two-year period with an expected/assumed purchase order by the first quarter of 2021.

Bonnell have designed a specific tank to be used with the Bonnell Commander Body. The tank designed offer maximum capacity liquid carried on each side of the Commander Body. The Commander Body is a tub design body – to help material naturally flow to the center of the body for dispersing the material – without raising the body. All said - we use a specific manufacturer to provide the tank we designed. The tank manufacturer have typical price increase from year to year. Some years more volatile to raw materials – other years just overall cost increases. Another aspect of cost increase – incurred by Bonnell Ind. is the requirement – Bonnell must purchase large quantity of units, at one time.

Other aspects of the contract that affect our costing in this area – are the tank mounting brackets and the labor to assemble these components.

Please accept this explanation.

We will continue to review for any cost stabilization. Thank you for the opportunity to provide equipment.

Sincerely,

Joe Bonnell  
President
