Provide paint that when tested according to ASTM D 2805 has a minimum contrast ratio (hiding power) that is 0.96 when drawn down with a 0.005 bird film applicator on a 2A or 5C Leneta Chart or equal and air-dried for 24 hours. Calculate the contrast ratio as black/white.

K. Reflectance.

Provide paint that when tested according to ASTM D 2805 and ASTM E 1349 has a daylight directional reflectance of a 15-mil (380 µm) wet film, applied to a 2A or 5C Leneta Chart or equal and dried for a minimum of 24 hours, of no less than 84 percent for the white paint and no less than 50 percent for the yellow paint.

L. Bleeding.

Provide paint with a minimum bleeding ratio of 0.97 when tested in accordance with ASTM D 969, using a test panel for asphalt substrate.

M. Dry Through Time.

Apply the paint to a non-absorbent substrate at a wet film thickness of 15 mils, with a tolerance of 1 mil. Place the substrate, with the film applied, in a humidity chamber controlled at 90 percent relative humidity with a tolerance of 5 percent and at 72.5°F with a tolerance of 2.5° F. Determine the dry through time in accordance with ASTM D 1640, except use the minimum needed pressure to maintain contact with the thumb and film.

N. Acceptance.

Use only preapproved pavement marking paint. A list of preapproved pavement marking paint lots is available at the Department's website, www.dot.nd.gov.

Obtain two 1-pint samples of paint from each lot after the paint has been shipped to some point acceptable to the Department Personnel. Use epoxy lined cans for sampling water based paint. Department Personnel are to be notified and shall be present when each sample is obtained. Submit the sample 30 days before the scheduled use of the marking paint. If the paint sample meets specifications, the lot being represented by the sample will be accepted. If a paint sample fails to meet specifications, the lot being represented by the sample will be rejected and replaced with paint that meets specifications. All costs incurred in replacing non-specification paint shall be at the Contractor's expense.

No paint shall be used that is more than 15 months old.

In addition to the certificate of compliance specified in Section 106.01 C, "Certificate of Compliance" include a reference to the specific NTPEP test deck to which the paint formulation was applied, including NTPEP identification numbers and report numbers.
