---

All,

There has been a change to our standard safety vest contract. Grainger decided not to renew the contract that would have locked in their pricing for a year. As a result we will be using state contract 255-2 to procure standard safety vests instead of rebidding the contract at this time. Attached are quotes from three of the vendors on the contract that will provide the same vest as the previous contract. You are able to order from any of the three vendors. Prices may change after the listed price expiration dates. Please insure that the PIP 303-HSVPLY safety vest is ordered/received, since this vest has been approved and meets our specifications. The basic safety vest (ACME Tools) and surveyor safety vests (Heaven's Ark) contracts remain in place and the vests will continue to be ordered from those vendors. Let Cheri or me know if you have any questions.

Thank you,

Barry Kinnischtzke, PE
